 Cali, Colombia

professional profile

Innovative, proactive frontend developer with the ability to develop elegant and pioneering web pages and application designs for demanding clients. Expert in project management, team leadership and problem solving independently. Organized and multitasking with experience in project scheduling, design improvement and code verification.

As a work experience, I did a web platform for the administration of absenteeism for SENA in 2018, by 2021 I resumed my learning as a web developer, reinforcing my skills and abilities. In online platforms such as platzi where I have acquired guidance to reinforce and advance my knowledge.
